E459	<u>EXITS AND DOORS</u>	September 2009

Explanations

Section E459 EXITS AND DOORS

Subsection E459(4) This Subsection essentially means that any transparent glass door or panel whereby the gap from the bottom of the door to the floor is less than 30.48 centimeters; and that door or panel could be mistaken for a doorway, shall be constructed of laminated, tempered or wired safety glass that meets the requirements of the National Building Code of Canada.

Subsection E459(5) Subsection E459(4) does not apply where the door is fitted with something that clearly indicates the presence of a door or panel.
